

## **Infection Prevention Specialist**

**Chicago**

This full-time position offers a competitive salary, excellent benefits, the opportunity to work from home, and a flexible schedule.

VigiLanz Corporation is conducting a search for an experienced acute care Infection Preventionist to join our rapidly growing team in providing the next generation of software support to Infection Prevention, Quality and Pharmacy communities.

As an Infection Prevention Specialist with VigiLanz you will work in collaboration with the ICM and Implementation teams. You will work primarily from home providing training and support to new and current clients. You will be expected to conduct education and in-service sessions as well as participate in regional meetings and calls as a subject matter expert. As a subject matter expert you will be called on to contribute to development concepts, as well as marketing strategies. You will also be required to keep abreast of new trends or changes in infection prevention and control. We take pride in our excellent client support; excellent communication and teaching skills are required.

Our ideal candidate possesses:

- Five years of acute care hospital infection prevention experience
- Registered Nurse
- NHSN surveillance and data entry experience
- CIC (Certified Infection Control)
- Experience with antimicrobial stewardship
- Excellent independent work skills
- Excellent verbal and written communication skills
- Excellent people skills and strong computer literacy
- Good analytical skills

This position requires occasional travel to provide training or attend organizational meetings such as APIC.

VigiLanz is a small privately held company that is growing very rapidly. Our ideal candidates are flexible, excited about rapid growth, self-directed and organized.

All inquiries and resumes will be handled in complete confidence — please forward to:
